

November 11, 2001

Alan,

What you propose sounds like a great deal for me. You might want to re-consider when I find out how many slides my folks have. I plan to go see them and bring back the slides tomorrow. I don't know how many they have.

I do have one question: Why would you scan at 2000 x 2000 and put them on CD at 1000 x 1000?

The scans we did yesterday looked even better on our TV, in a darker room.

Steve
