

February 6, 2002

Alan,

I bought a film scanner, but it hasn't been delivered yet. After extensive research on the Internet, I settled for an Acer Scanwit 2740S (\$500). It scans 4 slides at a time and comes with Digital ICE - a dirt removal feature similar to Canon's FARE system. We will see how it works with my old PC.

Did you get anything settled with your parents?

Steve
