

5/12/03

Dear Master Gardener,

Do you know where I can get information on lawn care? Like how to diagnose my lawn problems, and then how to fix them? I know I can kill dandelions and other broad leaf weeds with Weed-Be-Gone. What about weed grasses?

I've seeded bare spots this spring and the seeds have come up except where I didn't rough up the soil first.

I seem to have the grubs under control, but they've been such a problem that I plan to use Diazanin yearly. I think I've read that the best time to apply it is in May or June.

There is going to be a demo of kayaks Wednesday from 4:00 to 7:00. It is sponsored by Raupp Campfitters. You will be able to try various brands and models. It will be at private campground (can't remember the name) at Jolly and Aurelius. I think it is south of Jolly. If you are interested in going, let me know.

Steve
