Nina,

I read the article you sent on electronic voting. It is pretty scary. I like the idea of electronic voting, but the way they have gone about it is going to set the concept back a few years. I think the only way to do it is to tie each vote to the voter. I am attaching an essay I wrote on the subject.

Do you use Google? It allows you to search the Internet. I did a search on "Diebold voting" and got all kinds of info on the electronic voting scandal. Google is wonderful. It is at [www.google.com](http://www.google.com).

Steve
