

12/31/03

I guess I did live on vegetables, milk and eggs for a while a long time ago, when I was cooking for myself. Carol can't live without meat, and I like it when it is prepared well. I know it is not the proper diet for a small planet.

We are having 3 couples over tonight. First we are going out to dinner at Clara's. One couple we do stuff with all the time - pretty much are only friends. The wife in the second couple is a woman Carol and I worked with several years ago at the Retirement Bureau. And the husband in the third couple is a guy I used to work with 25 years ago at Social Services. So we are cleaning house this morning.

It is warm (40s), sunny and windy here today.
