Rich and Laura,

I really don't know much about web design, but I could set up a web site for you. Looks like you can get one for as little as \$60 a year (\$4.95 a month), which includes registration of your domain name (bardenfarmmarket.com). Do a search on "web hosting" and you will see a couple of sites that rate web hosting services. I use IX Web Hosting, and they are rated #2 or 3. They are at www.ixwebhosting.com.

I don't know hypertext, the language of web design, but I have Microsoft FrontPage, which makes it pretty easy.

Steve
