

January 4, 2008

No plans for Florida yet. Carol's blood pressure was quite high a few days ago, so she broke down and asked her cardiologist to write the blood pressure prescription he'd recommended weeks ago. She still isn't feeling well, but now is blaming it on the medicine. But we would like to get together for dinner as soon as you and Brigid are feeling better.

We read the nice write-up on Brigid in the WKAR magazine.

Steve
