Hi Sports

I never know what to do about writing to college folks at this time of the year, are you going somewhere for the summer? Have you left already? Or do you have a summer semester that will keep you there all summer? I don't know why I should worry about it, it wouldn't make any difference whether you read what I have to say today or six months from now.

Well, we got back from Florida on the eighteenth of March. We didn't spend so much time in the Keys, with Cindy along for the first two weeks, we spent about ten days in the Orlando area, seeing Disney World, Sea World, etc. And than about the first of March we headed back north very slowly. Visiting the Everglades, and just poking along the west coast of the state. We really enjoyed a couple of days with Ashley, Thelma and Francis. Got home just in time for a week of ideal weather, while the whole area we had just left was experiencing lousy weather. We also enjoyed having Pete and Eleanor in the keys for a few days.

Now we are planning to leave for California about the fifth of Aug. and to stay until the week after Labor Day, when ever that is. We will attend a reunion of the 11th Airborne Division, the first I've ever attended, in Anaheim, and spend the rest of the time with the kids and see June's Mother and brother. Right now each of the three kids insist that they want us to spend all of our time with them, I convince them otherwise when I get there. June wants to do a little genealogy work, she knows very little about her roots. I guess Elva's letters, and the tasks she is giving me are having thier effects on June.

I figured you should have a picture of you handsome brother with his cap, direct from Scotland, and his beautiful beard. Elva says that when Janis saw it she said " Tell him to shave it off, he looks as old as Methuselah", but what the hell does that young punk know. The other of course, is of June on a little key in the Everglades Park, we had taken a trip on a park boat out among the Ten Thousand Islands on the western side of the park. And she is shelling, as usual. We really enjoyed the trip up the coast and p^{fn} to repeat it next winter, seeing the places we missed this time. We've seen about everything there is to see in the Keys two or three times, will probably still stay down there for February because of the weather, but move around more in January and March.

Love
