10:30

Dear Shirley,

The sun is out right now but there have been several "white outs" this morning. Yesterday was bad but cleared up in the late afternoon. We had UMW with a good speaker yesterday in the AM but only 6 there - bad weather. The speaker was a woman who goes in to the homes of pregnant women - on Medicaid I think and teaches them how to care for children & themselves during pregnancy & etc. She said it was federally funded so she didn't have to follow Co. line.

Then I drove to S.H. to work in the Coffee Shop. I was only there an hour when they decided to close it cuz 2 other workers - gift shop side & lunch called in not coming.

I'm too new to be left alone. In the evening was C.K.F.C. board entertaining the various organizations that make up Prec. - township boards, City Council, School Bd & etc. They have to pay for their own meal. They were shown a video of activities & a run down of organization. The rest of the week absolutely dead.

Let us know when your tests come back.

It was sudden about Mr. Cooper. He was in the coffee shop last week & came to town

his blood tested the week before when I worked on
~~Cholesterol~~ testing. The people around the hospital
thought a lot of him. Lois told me last week
that she and ~~some~~ someone were planning a trip to
England this summer. Sues Eric Mook was going
to stay with the doctor. Clyde sure thought a lot of
him. I don't know if they went to the memorial or not.
Their spin is mostly general homes, out to eat - with
2 main restaurants & up to Kately's church.

We still have lots, kids about 12 Cardinal
Yesterday when the weather was bad again.

We got talked into changing to NCI from ATT now
I'm going to sit her & read material and see if
I can figure out why.

Let's us know. Love
E
