Jan. 20 1988

Dear Folks,

I felt sure Eleanore would not send you the enclosed clipping and feeling sure you would enjoy reading it I am sending it.

I went over to Laura's Monday morning and held David Allen for an hour. He looks like the Bardens but has a rather large nose that we don't know where he inherited that. Laura and the baby had rather a hard time but both will be OK with a little time.

I had dreaded January because it usually is very dull with little going on but this year has been busy. When roads aren't too bad I walk a mile at the school weekdays at four. I finally got Janis started doing it!

We had a nice week in Florida at Christmas. Spent one day at Epcot. and strolled along the beach one afternoon.

Janis finally had a conversation with Jane's doctor who told her that the cause of death was a reaction to the medicine she was taken which was very rare and would not be easily recognized.

Hoping you all are happy and well,

with love,

Eleanore
