

April 9, 2002

Cindy,

I've been taking Synthroid for about 9 years. My symptom was lack of energy.

Walt says he started taking it not long ago because of his dizzy spells, and it cured them. This was after they'd given him a pacemaker for the same problem.

Aunt Shirley had pain in her legs for years. Finally she started taking thyroid pills and the pain went away.

And Dad started taking thyroid a year or so ago to get his bowels moving.

It is the miracle cure!

So what are your symptoms?

Steve
