

September 28, 2007

Tom,

You didn't waste my time. I read stuff I don't agree with all the time. And I agree with Stossel completely on some things, like how farm subsidies are a waste of taxpayer money. I also agree that PBS and NPR should not be tax supported, although NPR is all I listen to on the radio. But I don't agree with him when he says fossil fuel burning is not increasing global warming, and instead of trying to stop it, we should build dykes and move back from the coast. Have you read the book?

Dad
